Collection

Colour card and finishes

Above printed colours have to be considered as a mere guide, for the real colours please ask Ponte Giulio the sample colour.
The blue colour codes refer to the "acrylic stone", the star symbol refers to opal version.

For more than 40 years Ponte Giulio has been concentrating its activity in the bathroom, both private and public, and may nowadays offer a wide range of products and solutions. During the years Ponte Giulio became a leader manufacturer of safe and elegant bathroom articles.

Today Ponte Giulio exports its products in the most important world Markets and is engaged to supply quality and reliable bathroom solutions, thanks to the relevant investments carried on for research and development and enabling a constant product improvement and new possible solutions for the coming years, which are an intrinsic peculiarity of the "Made in Italy".

Collection Midioplan

Ponte Giulio's Midioplan Collection is a complete programme made up of consoles, wash basins, shower trays and bathroom accessories offering standard or customised solutions.

The Midioplan products are realized in acrylic stone and conceived to strictly combine an aesthetic design with an excellent functional performance and convenience.

In the Midioplan Collection the raw material becomes the main player thanks to the design shape, colour and a style in accordance with the different needs.

What is acrylic stone

Since the first appearing on the market in 1967 the acrylic stone has been constituting a real industrial revolution in the manufacture of kitchen and bathroom countertops, offering the same benefits of a natural stone without the typical defects and drawbacks of syntetic or semi-synthetic materials. It enables the manufacture of different shapes and sizes and can be worked like wood.

The acrylic stone is a non-absorbent, non-porous solid surface composite material, belonging to the solid surface category. It is composed of roughly two thirds aluminium trioxide (proceeded from the bauxite) and one-third high quality acrylic resin, with the addition of small quantities of coloured pigments. The peculiarity of acrylic stone is a long lasting life, capability of withstanding the rigours of daily use and it does not discolour when exposed to direct sunlight. These qualities make acrylic stone the ideal solution for almost any indoor or outdoor application, offering a wide variety of shapes, sizes and colours.

Eco-friendly

Its mineral and acrylic resin composition, the low-consumption production process and "zero waste" machining give the material a high ecorating.

Uniform surface

The possible hidden joints give the impression of a single, solid block, even where the machining and installation are particularly difficult or elaborated.

Hygienic

Acrylic stone is a non-toxic material which does not produce surfactants, and has a non-porous surface with no visible joints. Ponte Giulio focuses on machining techniques avoiding sharp edges for an easy cleaning.

Long-lasting

The surface can be easily cleaned using water, a drop of detergent and a cloth. To remove any scratches, all you need is a "Scotch Brite" or similar sponge or a fine sandpaper.

High-resistant

Acrylic stone shows a very high resistance when exposed to most chemical agents, does not discolour when exposed to UV-rays and has an excellent mechanical strength.

Repairable

Deep scratches or serious damages resulting from improper use can be repaired, either on-site or at our factory.

*The use of reproduced pictures from Page 4 to 7 has been authorized by "© Hi-Macs®".
www.himacs.eu"*

The acrylic stone is an extremely flexible material which may be used in Furnishing Industry and Architectural Design in various sectors such as "Offices", "Hospitality and Catering", "Schools", "Retail and Contract", "Kitchen", "Healthcare and Wellbeing"

TECHNICAL FEATURES

For the manufacture of its products Ponte Giulio employs high quality plates, which are guaranteed by the execution of tests on them, in compliance with the most strict Norms.

Physical mechanical properties of the acrylic stone

Property	Method	Value
Hardness (Mohs)	EN101	da 2 a 3°
Hardness (Brinelli)	DIN EN ISO 2039-1	257 N/mm2
Hardness (penna)	ISO 15184	>9H
Non-fading (Xenon)	DIN 53 387, 04-'89	better than 6
Scratch resistance	DIN 68 861, part 4, 11-'82	4D
Anti slip resistance	DIN 51130	R10
Water absorption	DIN EN 438 Part 12	
weigh		< 0.1%
depth / thickness		< 0.1%
Mass resistivity	EN 61340-5-1	non-conducting insulator
Thermal conductivity coefficient	DIN EN 12664	0.636
Tensile strength	DIN EN ISO 527	69.5
Temperature change resistance	UNI 9429	no change
Bending modulus of elasticity	DIN EN ISO 178	8900 MPa
Bending strength	ASTM D638	70.1 MPa
Impact strength		
Impactor	E DIN EN 438, 02/02 Part 2/20	≥ 25 N
Ball drop (drop height)	E DIN EN 438, 02/02 Part 2/21	≤ 1500 mm.
Anti slip resistance	GMG100 (replaces R9)	> 0,32 - 0,9
Cigarette burns resistance	DIN 68 861, Part 6, 11-'82	6C
Hygiene	Hygiene Certificate LGA	Compliant

THE COLOUR

The colour generally gives a sharp imprint to all kind of manufactured articles. The acrylic stone, among other benefits, may offer an unlimited colour combination choice able to satisfy every taste and requirement. As a matter of fact some colours are more appropriate than others depending on the application field, need and use, therefore and for this reason Ponte Giulio presents only some collections in specific colours.

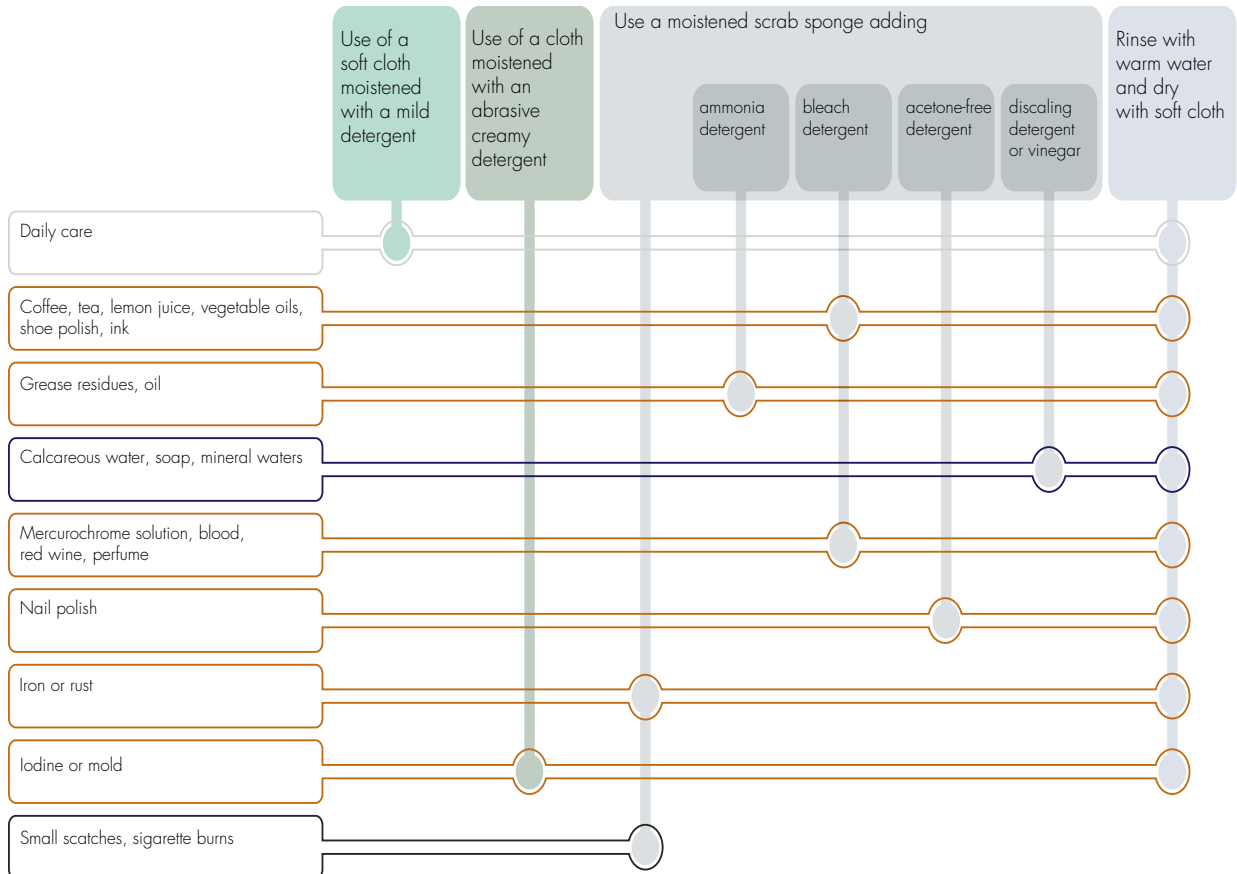

INSTRUCTIONS FOR MAINTENANCE AND USE

The acrylic stone has a high resistance to the chemical agents and to the mechanical stress generally caused to the articles during daily use in domestic and professional environments. Nevertheless this material needs a regular cleaning and maintenance. The use of simple precautions enables to maintain the products in perfect conditions. Being a non-porous material it does not absorb any liquid, so in case of light stains it is enough to clean with a cloth moistened with a household detergent, while the stubborn stains may be removed by means of a Scotch-Brite® scrub sponge moistened with an abrasive creamy detergent.

SUGGESTIONS FOR THE REGULAR CLEANING, USE AND CARE OF THE ACRYLIC STONE

Standard, custom-tailored or custom-designed models

The Midioplan programme of shower trays, wash basins, consoles has been conceived for offering free choice of shapes, sizes and colours as well as custom-tailored models and even models realised upon specific customer design.

During the years Ponte Giulio has optimised its acrylic stone working processes and got to the ideal combination of CNC machine production and craftsmanship.

1 Production of semi-processed items by means of sheet thermoforming

2 Deburring and milling by means of CNC machines

3 Assembling and first manual control

4 Hand finishing

5 Joining and fixing of the structures.
Final check of aesthetic look,
careful packaging and forwarding operations

Tailored solutions for any kind of bathroom environment

Anyone of us, at least once in life, has been obliged to face the problem of restyling or planning a new bathroom. But a plumber or a designer are daily called to solve problems of space or technical constraints. To make our

and their life easier, Ponte Giulio has designed a programme of articles in acrylic stone, enabling a sophisticated customisation of the shapes and sizes and offering a solution for almost all kind of problems.

AVAILABLE SPACE

WASH BASIN AREA

SHOWER AREA

SPECIAL SHAPES

COMPULSORY WIDTH AND DEPTH

REGULAR SHAPES WITH ACUTE AND OBTUSE ANGLES

SURFACES WITH UNDERCUT SECTIONS

Hereunder are illustrated some bathroom restyling projects for both private and public environments. For each one of them two main principles have been taken into consideration: no plumbing work and replacement of standard items with tailored articles, in order to optimize the room

and make it livable. Links you may see the drawings of the bathrooms before the restyling where the sections "marked in red" point out the areas which would not be usable if standard items are installed and where heavy adjustment works should be executed.

BEFORE

AFTER

Replacement of a shower tray 80x80 cm with one tailored in acrylic stone, and of a vitreous-China wash basin with an acrylic stone console.

Replacement of a bathtub 70x170 cm with a tailored shower tray in acrylic stone, and of a standard wash basin with an acrylic stone console with countertop.

Replacement of a shower tray 90x90 cm with one in acrylic stone tailored to the available space, and of a small wash basin with an acrylic stone console with countertop.

Replacement of a corner shower tray 80x80 cm with one in acrylic stone tailored to the corner, and of a small wash basin with an acrylic stone console with countertop.

Complete optimization of the bathroom space thanks to the replacement of a traditional shower tray with one in acrylic stone and the installation of a console instead of a small wash basin.

BASINS
WASH BASINS
CONSOLES
WASH BASIN TOPS

B46ANM01 Countertop basin with top model LITE

The basin "Space" of the Line "Ross" is the smallest one of the "Midioplan" Collection. While the basin is only white, the top maybe tailored in the different contrasting colours.

- < B46CMM01 Wash basin model SPACE
- < F47ANM02 Shelf line ROSS

The Line "Ross" foresees basins in reduced sizes suitable for small environments or simply for saving space. The model for corner installation is particularly fit for this purpose.

If more space is available the size 600 mm offers the addition of a small top surface both sides of the basin.

- ^ B46CMM07 Wash basin model SPACE
- < B46CMM06 Wash basin model SPACE
- < F47ANM02 Shelf line ROSS

CUSTOM-TAILORED 

> ^ B46CUM06 Countertop basin model SLIDE, on top F47ANM08

“Deep” basin has wide sizes and square shape, it is equipped with manhole drain with cover tile.
Available in white colour only.

< ^ B46CMM13 Countertop basin model DEEP, on top F47ANM08

“Cuboluce” is a small size basin in square shape, housing a soft light lamp. It is realized in translucent acrylic stone, available in four different colours: Blue Sapphire, Emerald, Opal White and Green Yellow

< B46CMM10 Wash basin model CUBO

^ B46CMM11 Wash basin in translucent acrylic stone, equipped with LED lighting model CUBO

< ^ B46CUM01 Countertop basin model SWEET

BASINS

“Cubo” is a solid standing wash basin with minimal square shape, designed for installation along the wall or free-standing.

A model with inside lighting system, in translucent acrylic stone is available. Choice of four colours.

^ B46CUM05 Standing wash basin, standard version [model CUBO](#)

> B46CUM08 Standing wash basin in translucent acrylic stone, equipped with LED lighting [model CUBO](#)

< ^ B46CUM02 Standing wash basin model NATALIE

BASINS

“Roll” is proposed only as basin and possible installation of water mixer on the basin body. This article may be installed along the wall or free-standing and tailored in the available colours.

^B46CUM03 Standing wash basin with hole for water mixer model ROLL

> B46CUM04 Standing wash basin without hole for water mixer model ROLL

“Keilos” is an elegant wash basin combining the body square shape with the waviness of the front panel. The wash basin body is only white, while the front panel may be realised in the available colours.

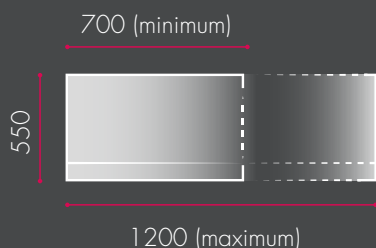

CUSTOM-TAILORED 

“Quarantacinquegradi” (fortyfive degrees) is more than a wash basin, it is a range of solutions allowing a wide customisation. Aesthetically this wash basin has a front bended top integrating a cutted section to be used as towel holder.

The top is only in white, while the basin may be produced in the available colours. The tailored executions are detailed hereunder.

SHOWER TRAYS

The Ponte Giulio programme of shower trays in acrylic stone offers a wide variety of tailored shapes and sizes, enabling a solution for each kind of installation need. A large choice of colours allows to create elegant and appealing environments.

CUSTOM-TAILORED 

The decision of installing a flat-to-floor or classic raised shower tray may be based upon aesthetic or technical reasons, therefore Ponte Giulio has created shower trays which may be free installed according to the single different needs.

✓ SHOWER TRAY INSTALLATION INSTRUCTIONS

Installation over the floor level

Semi-recessed installation

Flush-to-floor installation

One of the most important step in a shower tray installation is for sure the choice of the type of drain. The Ponte Giulio range foresees a rich assortment: from the traditional waste with syphon and cover plate, in chrome or in the same material of the tray, up to the manhole drain system to hide the waste hole with cover tile in acrylic stone or stainless steel.
