

GENERAL BATHROOM SAFETY CATALOG

WHEN YOU NEED
BATHROOM SAFETY PRODUCTS,
THINK OF PONTE GIULIO FIRST.

Orvieto, Umbria, Italy. Home to Ponte Giulio Design and Production

We really are the Bathroom Safety Experts.

Ponte Giulio USA is the North American office and warehouse for our parent company which is located in Orvieto Italy. We manufacture Bathroom Safety Products – shower seats, shower enclosures, ergonomic sinks and grab bars – everything for accessibility in the bathroom.

Ponte Giulio has been manufacturing bathroom safety products for 50 years, always with safety and accessibility at the center of our design. Our engineers and designers constantly strive to create new products that will lead the market with innovation, style, function and beautiful aesthetics.

Our name is pronounced Pon-Tay Julie-O.

We offer products for commercial and residential installation. Architects, designers, contractors, builders and remodelers rely on Ponte Giulio to supply the best modern safety products for every application. Grab bars are the most frequently installed safety product and we offer a full range of products to choose from including Stainless-Steel, the workhorse of commercial projects.

G25JAS03, PRO Series straight grab bar - B43CMS01WB, Italian designer sink

GRAB BARS

Grab bars are the most economical safety product. Anyone, young or old, can fall in the bathroom because it is a slippery, wet environment. Installing grab bars can help prevent slips, trips and falls. Think of grab bars as the “seat belt” of the bathroom – designed to keep you safe if you ever need it.

PRO Series

The Superior Grab Bar

The vinyl coating on Ponte Giulio PRO Series products is anti-microbial due to the BioCote® Silver Ion technology in the vinyl that reduces microbes, bacteria and fungi up to 99.9% .

The vinyl is easy to clean, just wipe with warm soapy water using a soft cloth and the grab bars are clean. In addition, the vinyl coating is softer and warmer to the touch.

PRO Series is a SUPERIOR safety product at an economical price. Available in 11 color options.

Bariatric, Extra Strong, Products

Add Confidence

Bariatric products including grab bars and folding shower seats (see pages 95 & 101) are designed with extra flanges and stronger materials to provide support for weight over 1,000 pounds. Extra flanges provide support for larger weight loads and accommodate the “plop” factor when someone sits down. These specialty safety products add confidence, peace of mind and comfort to individuals who need extra support.

Bariatric, Extra Strong, Straight Grab Bar

Color / Finish: N.A.

Materials: N.A.

- Exceeds ADA load capacity requirements and all building codes
- Rated up to 600LB in drywall with tile
- Drill Bit part number: Y96SFS01

OPTIONAL

- **Y96SFS01**
- Standard Fastener 3/4" drill bit
- 3/4" drill bit

Snap Toggle Bolt Anchors

Y96SES60

Color / Finish: Stainless Steel & Plastic

Materials: N.A.

- Snap Toggles allow installation into hollow walls – a great alternative when wood studs are not available.
- Must have 1 7/8" clearance behind the wall
- Set of 4 Snap Toggles with 304 stainless steel channels and bolts – for one grab bar installation
- Purchase one set for each grab bar being installed
- BAS 3/16" – 24 Snap Toggle (4)
- Made in USA
- Easy to install:

- 1 - Slide the metal channel into a pre-drilled 1/2" hole
- 2 - Hold the ends of the straps and pull toward you until the channel rests flush behind the wall.
- 3 - Pull back on the straps and slide the plastic cap along the straps until the cap is flush with the wall.
- 4 - Push straps side to side, snapping off the straps level with the wall
- 5 - Place the grab bar over the flange, insert bolt through grab bar flange and tighten until flush.

The Solid Mount® Anchor System

Y96SES66

Color / Finish: N.A.

Materials: N.A.

- The Solid Mount® fills the 7/8" to 2 1/8" open space behind a fiberglass shower surround to the stud.
- One (1) Solid Mount Set is needed for each grab bar being installed.
- Supports a weight capacity of 300 pounds
- Installation takes about one hour
- The Solid Mount Set includes: 2 – 3" diameter mounting plates, 2 – adjustable thread mounting shafts, 2 – 5/8" lag bolts, 6 – stainless steel screws and 2 – stainless steel washers.
- Watch the installation video before installing – see QR Code

Economic L-Shaped Folding Shower Seat with Legs, Stainless Steel and HPL

G56UHS03 – L-Shaped – 31 ½" wide

Colors / Finish: None – Stainless Steel and HPL

Materials: Stainless Steel mounting flange & frame, HPL seat

- Seat is 31 ½" wide, 15 ¾" deep 22 ¾" deep
- 360-pound load capacity on edge & 600-pound load capacity at center line
- Legs and floor support 75% of weight load capacity
- Legs are adjustable, 17" to 19"
- Seat is reversible to either left or right orientation
- 100% Stainless Steel frame and mounting flange
- No finger pinch points
- Seat is strong & stable HPL (High Pressure Laminate) and always white with speckles
- Installation hardware included for wood stud mount
- Tension hinge located on flange and leg, prevents the seat from falling
- ADA rated
- Rust proof and Lifetime warranty

Economic Small Shower Seat with Legs, Stainless Steel and HPL

G56UHS01 – Small Seat – 22" wide

Materials: Stainless Steel mounting flange & frame, HPL seat

- Small seat is 22" wide, 14 ¼" deep, 17" to 19" high
- 600-pound load capacity
- These seats are highly recommended – excellent quality and economically priced
- Legs support 75% of the weight load capacity
- Seat in HPL (High Pressure Laminate) and is white with speckles
- 100% stainless steel frame and mounting flange is rust proof
- Tension hinge located on flange and leg, prevents seat dropping and there are no finger pinch points
- Installation hardware included for wood stud mount
- ADA rated and exceeds load capacity requirements
- Lifetime warranty

Economic Medium Shower Seat with Legs, Stainless Steel and HPL

G56UHS04 – Medium Seat – 27½" wide

Materials: Stainless Steel mounting flange & frame, HPL seat

- Medium seat is 27 ½" wide, 15 ¼" deep, 17" to 19" high
- 600-pound load capacity
- These seats are highly recommended – excellent quality and economically priced
- Legs support 75% of the weight load capacity
- Seat in HPL (High Pressure Laminate) and is white with speckles
- 100% stainless steel frame and mounting flange is rust proof
- Tension hinge located on flange and leg, prevents seat dropping and there are no finger pinch points
- Installation hardware included for wood stud mount
- ADA rated and exceeds load capacity requirements
- Lifetime warranty
- Seat does not require reinforced wall

Economic Large Shower Seat with Legs, Stainless Steel and HPL

G56UHS02 – Large Seat – 31 ½" wide

Materials: Stainless Steel mounting flange & frame, HPL seat

- Large seat is 31 ½" wide, 14 ¼" deep, 17" to 19" high
- 600-pound load capacity
- These seats are highly recommended – excellent quality and economically priced
- Legs support 75% of the weight load capacity
- Seat in HPL (High Pressure Laminate) and is white with speckles
- 100% stainless steel frame and mounting flange is rust proof

LIST OF MATERIALS

ABS

Acrylonitrile butadiene styrene or ABS is a common thermoplastic polymer. It offers mechanical resistance and physical stability. This plastic is resistant to impacts and corrosive chemicals, features a lovely shiny surface, is non-toxic and can be recycled.

ACRYLIC STONE

This composite, synthetic material blends the features of natural elements such as stone, with the advantage of being manufactured in any shape. Generic term for Corian by DuPont or LG Hi Macs. Solid surface, durable, easy-to-clean, non-porous material so stains do not penetrate the surface. Used to manufacture sinks, shower trays and accessories.

ALUMINUM

It is extremely soft, light, and resistant to oxidation thanks to a thin layer of oxide on the surface which prevents the oxygen from corroding the metal beneath. Aluminum is strong, corrosion resistant and will not rust.

HIGH PRESSURE LAMINATE (HPL)

Compression molded laminated plastic, excellent strength and stability, ARC and solvent resistance. Used for commercial products that must stand up to non-stop use. Also called PHENOLIC.

MINERAL COMPOSITE

It is a synthetic material formed by at least 75% of stone from the Dolomites. It is an ecological material, chemical resistant, durable with high impact strength and outstanding electrical insulation. Used to manufacture sinks and shower trays.

NYLON

A synthetic polymer, thermoplastic material that is injection molded. This tough, strong, easy to clean material is also soft and comfortable. Used to manufacture flange covers & slats for some seats. Also called POLYAMIDE.

POLYETHYLENE (PE)

Polyethylene is a synthetic polymer and the most common plastic. Ponte Giulio uses PE-LD, low density version in products. It is flexible, soft and tough, it may be recycled and is safe.

POLYURETHANE (PU or PUR)

Is a polymer. It is soft, comfortable, durable, lightweight and easy to clean. Used in production of shower seats.

PORCELAIN

Hard porcelain is a mixture of feldspar, kaolin and quartz. It undergoes a firing process with temperatures between 1000°C and 1500°C where it acquires features such as resistance to scratches, impacts and chemical agents. Ponte Giulio uses porcelain to produce sinks, the white ceramic is durable, smooth, easy to clean with natural beauty.

SAFETY GLASS

Used in shower enclosures, safety glass is less likely to break or cause injury if it does break. Safety or tempered glass is 5 to 10 times stronger than regular glass.

STAINLESS STEEL

Stainless steel is an iron alloy which provides resistance to corrosion especially when used in damp environments or with fresh water. Ponte Giulio uses stainless steel will not rust, is durable, tough and strong and less likely to ding or burr.

STEEL

It is an alloy composed mainly by steel and up to 1.7% of carbon. Steel is commonly referred to as "Iron". It is lightweight and very strong.

STAINLESS STEEL

Stainless steel is an iron alloy which provides resistance to corrosion especially when used in damp environments or with fresh water. Ponte Giulio uses stainless steel that will not rust, is durable, tough and strong and less likely to ding or burr.

TEAK

Teak is a tree species - Verbenaceae - characterized by a straight, regular trunk. The wood has a medium to low hardness, low shrinkage and high stability, especially when seasoned. The presence between the fibers of an oily resin gives a perception of "grease" to the touch, this characteristic ensures excellent durability; it resists moisture, saltiness, acids and attacks by insects and fungi well.

VINYL

Is the world's most versatile plastic, it is soft and warm to the touch, when used to produce grab bars, it seals and prevents water from reaching the steel pipe. Vinyl grab bars offer a superior grip. Ponte Giulio treats their vinyl with BioCote, making it anti-microbial.

ZINC-PLATED STEEL

Zinc-plating is a surface coating that will prevent corrosion and rust. It is strong, durable and used in Ponte Giulio mounting systems, hinges and product frames.

[illegible]

ECOLOGY

This document has been produced with the greatest possible respect for the environment. We also suggest that those who will be using it contribute to this by passing it on to other people after consultation, or by recycling it.

WARNING

The information and data provided in this document, even if verified and compiled with the utmost care, cannot be considered binding.

Ponte Giulio reserves the right to make changes, even without notice, in order to improve the characteristics of its products.
