

# 5 ways VINYL grab bars are SUPERIOR

1

Helps keep every bathroom more hygienic. Vinyl has silver ion technology that provides **anti-microbial protection** against bacteria, fungi and microbes.

2

**Easy to clean.** Just wipe with warm soapy water and a soft cloth and the grab bar is clean.

3

**Feels better** because the vinyl is **warmer and softer** to touch than metal grab bars. The vinyl reflects the skin temperature back to the user. Warmer is better for people who suffer with neuropathy pain in their hands.

4

**Available in 5 popular colors and 9 lengths.** The options are extensive! Colors include white, ivory, biscuit, light gray and black. Lengths: 12", 16", 18", 24", 30", 32", 36", 42" and 48".

5

**Superior non-slip grip.** The vinyl is easier to hold on to when both wet and dry.
